

Photo #1: Glass

Before

Approximate distance from camera to subject: 3 inch

Type of lighting: Natural

Coposition Technique: Point of view

Camera Resolution and other settings: 24mm f 1.78

After

I used the crop tool to focus in on the glass. I used the spot healing brush tool to adjust some shadows that were shown on the glass. I used the Level adjustment tool to darken the image to put more emphasis on the glass.

Photo #2: Outside Sky

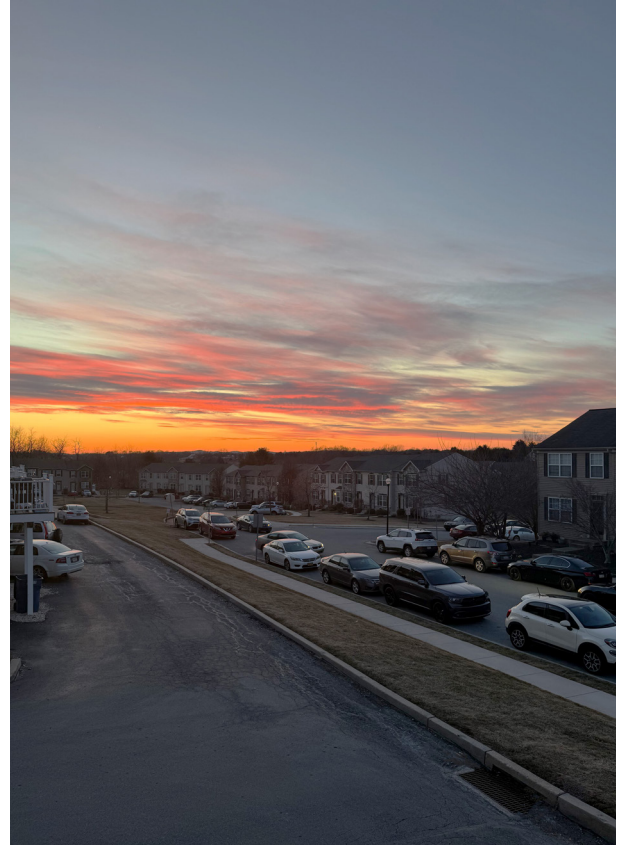

Before

Approximate distance from camera to subject: 20 feet

Type of lighting: Dusk

Coposition Technique: Point of view

Camera Resolution and other settings: 24mm f 1.78

After

I used the Level Adjustment tool to make the photo a bit darker to help bring out the colors of the sky. I also used the spot healing tool to get rid of some trash that was in the street that took away from the focus of the photo.

Photo #3: Lego Flowers

Before

Approximate distance from camera to subject: 3 inch

Type of lighting: Spot light

Coposition Technique: Bird eye view

Camera Resolution and other settings: 13mm f 2.2

After

I used the the crop tool to focus in on the flower-
sin a more horizontal way. I used the sopt healing
tool to get rid of the shadow that the flower stems
showed on the desk.

Photo #4: Plant

Before

Approximate distance from camera to subject: 2 inch

Type of lighting: Natural

Coposition Technique: Close up/ side view

Camera Resolution and other settings: 13mm f 2.2

After

I used the crop tool to zoom in on the plant a bit more and made it look liek more of a close up shot. I used the pot healing tool to get rid of some shadows on the side of the plant. I used the Level Adjustment tool to darken the image so it looked a bit more sharp.
